

powered by  **QUALITICS**

Looking for outcome-based high-quality testing before launching your applications?

Is output-based test outsourcing still giving you defective applications?

Qualify's Hyperscaling SaaS platform can give you a quick testing turnaround without the TURBULENCE of CAPEX and OPEX!

We promote the concept of a shared economy where,

- Customers connect instantly with seasoned global testers hand-picked by Qualify
- Testing Service Providers with available resources can engage them in projects efficiently
- Customers win defect-free applications while the testing service providers win regular projects
- Qualify gives you the perfect runway to take-off and test your applications 'on-the-fly' with these 5 easy steps

STEP 1: SIGN UP AND ACTIVATION

Take the pilot's seat. Setup your company account with us, add users and setup the projects, releases, and test cases.

STEP 2: CHOOSING YOUR TEST PLAN

You can choose your 'flight plan' based on your testing requirements and budget from our list. All the plans come with the guarantee of world-class analysis by highly-qualified testing professionals and premium test execution results. Activate the project, sit back, and enjoy the flight!

STEP 3: CONNECTING TO THE RIGHT TESTERS

We choose the right Test Crew to get the job done for you among our experienced and seasoned list of testers. Choose from the many types of testing and payment plans to suit your budget. Qualify will do the heavy lifting of connecting you to the right Testing Service Partner that will work for you full-time, dedicated to serving your QA needs. Qualify will work with you closely to provide guidance and feedback during the testing of your applications and ensure that the testing efforts make positive progress.

STEP 4: GETTING YOUR APPLICATION TESTED

This is when the ground work is done for a smooth landing. Testers will access your application using your Access Instructions and execute testing as per your selected plan and directions on their devices/systems. Qualify will be your control tower in overlooking the entire process.

STEP 5: TESTING COMPLETION AND REPORT HANDOVER

Once the testing on your application/release has been completed successfully, Qualify will work with the Testing Partner to develop a premium Test Execution Report. You can Review the test results (baggage collection) and begin planning your next testing effort.

Get your applications QUALIFLIED today in JET-SET-GO!

"QUALIFLY ASSURANCE IS THE NEW QA"

CUSTOMER TESTIMONIALS

"Qualitics digitized our Test Management Office, reducing the costs of manual tasks by 50% and improving the transparency of our operations. I personally thank them for bringing innovation and thought leadership to an old territory."

"Qualitics built an end-to-end strategy for our \$100M plus program that went into production on time and with expected levels of quality. Qualitics' team developed a detailed strategy and plan that helped various teams march towards our end goal while offering clear visibility at every step. They are the thought leaders in Software Testing. I wish them all the best with their flagship product launch: Qualify."

"Qualitics has deftly handled the engagement with IGS as Test Partners for all critical product releases right from the word 'GO'. They have always held the bull by its horns through their reliable knowledge in Agile Project execution and enabled us to deliver holistic and practical solutions, which is phenomenal."
